

NATIONAL WORKSHOP ON HOMOEOPATHY FOR HEALTHY MOTHER AND HAPPY CHILD

Duration: 2 days

Expected dates: November 5 and 6, 2007

Venue: India Islamic Cultural Centre, Lodhi Road, Delhi

Procedural techniques:

The workshop would be primarily based on practical application of Homoeopathic principles. A two-day intensive workshop on the model program will be conducted. The Primary resource persons would further identify participants who can be involved in conducting state and district level workshops, utilizing continuation of learning mechanism.

This model program would involve lectures and presentations, group discussions, break away sessions for different participants, exhibitions, resolutions, etc.

Capacity Building:

Development and implementation activities throughout the workshop will be structured in such a way as to maximize the exposure of the Workshop participants to the strengths of Homoeopathy, with respect to Mother and Child health care and sensitize them for better policy and program coordination and implementation in order to integrate the use of Homoeopathy for better Mother and Child Care at all levels. The Workshop would assist the participants in acquisition of new skills and knowledge that will lend themselves to the future capacity to replicate this Workshop at State and District levels and become active participants in the development and evaluation of Mother and Child Health programs in India, through Homoeopathy.

Participants:

Participation in the Workshop would be through invitation, only. 300 participants would be invited for the National Workshop
